

## DCG Overlap enrichment for GO terms

protein metabolic process  
positive regulation of response to stimu...  
positive regulation of signal transducti...  
positive regulation of nitrogen compound...  
positive regulation of macromolecule met...  
phosphate-containing compound metabolic ...  
cellular response to organic substance  
organonitrogen compound metabolic proces...  
positive regulation of cellular metaboli...  
cellular macromolecule metabolic process  
response to chemical  
primary metabolic process  
response to stress  
positive regulation of cellular process  
transport  
intracellular signal transduction  
regulation of biological quality  
cell surface receptor signaling pathway  
negative regulation of cellular process  
cellular component organization
