

Human DCG enrichment for GO terms

cellular response to stimulus

response to organic substance

positive regulation of nitrogen compound...

immune system process

regulation of biological quality

signal transduction

transport

cellular macromolecule metabolic process

cellular response to organic substance

phosphate-containing compound metabolic ...

positive regulation of macromolecule met...

positive regulation of cellular metaboli...

positive regulation of response to stimu...

organonitrogen compound metabolic proces...

intracellular signal transduction

negative regulation of cellular process

cell surface receptor signaling pathway

cellular component organization

positive regulation of cellular process

primary metabolic process
