

Human enrichment for GO terms

regulation of oxidative stress–induced n...
 stress–induced premature senescence
 succinate metabolic process
 protein targeting to peroxisome
 regulation of circadian rhythm
 mRNA export from nucleus
 tricarboxylic acid cycle
 innate immune response
 posttranscriptional regulation of gene e...
 protein sumoylation
 circadian rhythm
 DNA damage response, detection of DNA da...
 regulation of translation
 skeletal muscle cell differentiation
 regulation of alternative mRNA splicing,...
 cytoplasmic translation
 translational initiation
 SRP–dependent cotranslational protein ta...
 viral transcription
 nuclear–transcribed mRNA catabolic proce...
